

Installing and running UrbanVPN on a computer

1. Go to the address: <https://www.urban-vpn.com/locations/>
2. Choose location.

The screenshot shows the UrbanVPN website interface. At the top, there is a navigation bar with the UrbanVPN logo and various icons. Below the navigation bar is a large pink banner with the text "We're all around!" and "Find the best VPN servers for your needs". To the right of the banner is a cartoon robot wearing sunglasses and holding a globe. Below the banner, there is a dropdown menu labeled "What is your favourite location?" with the text "Choose Location" and a downward arrow. To the right of the dropdown, there are three lines of text: "Our VPN is 100% FREE", "Our Service is FAST!", and "You'll be ANONYMOUS & SECURE".

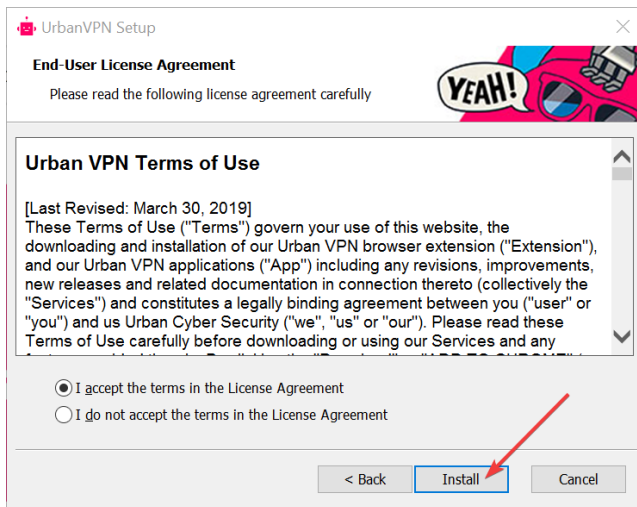

3. Click the Free Download button.
4. Open the downloaded file and install it.

The screenshot shows the UrbanVPN "Thank You" page. The browser address bar shows the URL "https://www.urban-vpn.com/thank-you/". The page content includes a message: "Your download should begin automatically. Didn't work? just click [here](#)". Below this message is a large pink banner with the text "Thank You for downloading!" and a cartoon robot wearing sunglasses and a blue cap, with a speech bubble saying "YEAH!". At the bottom of the screenshot, a Windows taskbar shows a taskbar icon for "UrbanVPN2.exe" with a red circle containing the number "3" next to it.

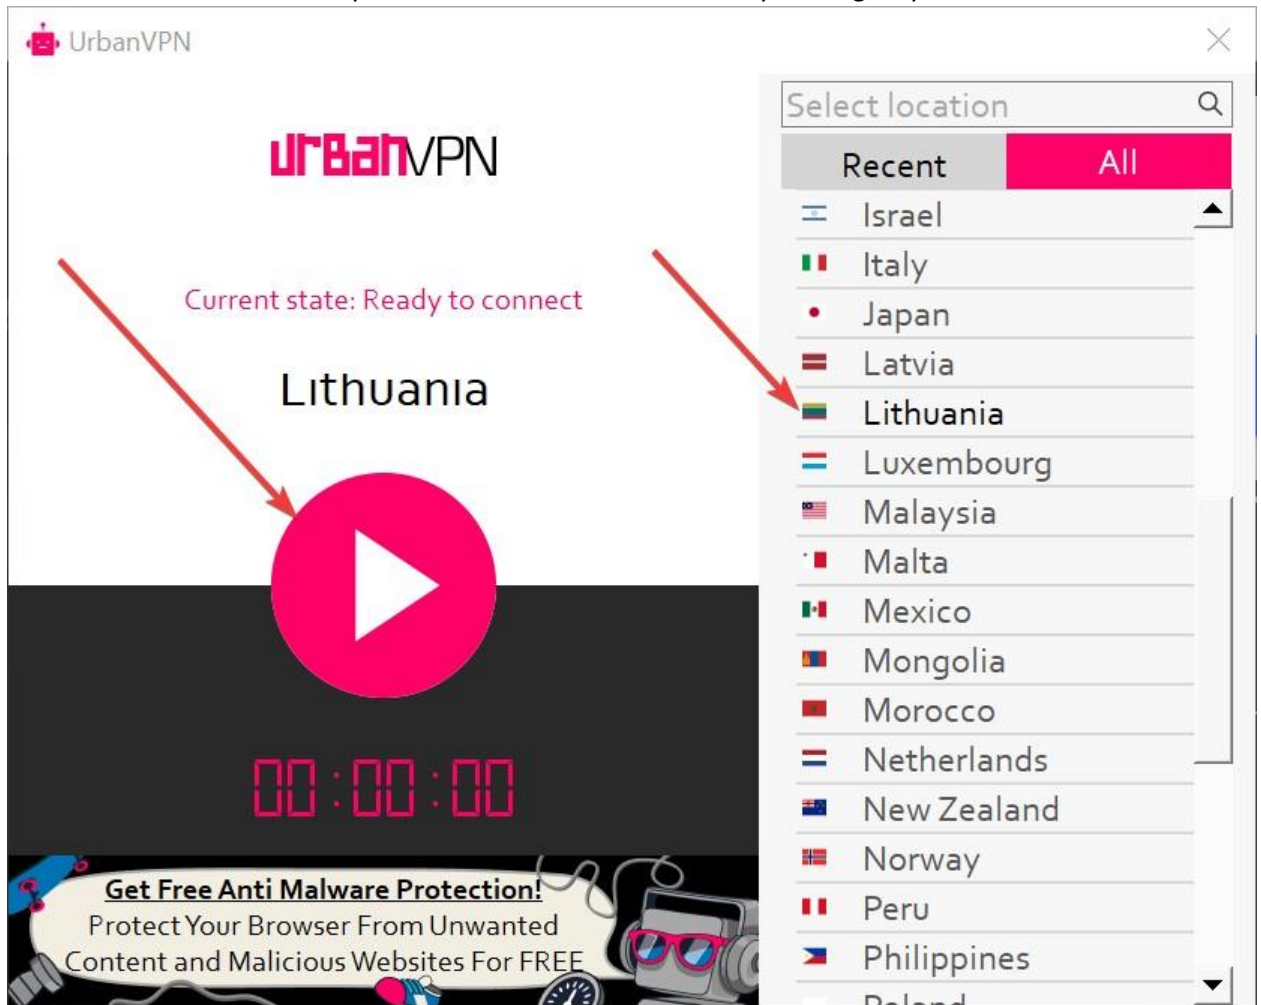

How To Install our VPN

5. Next, follow the following steps:

6. After installation, open and select the country in which you are located.

7. Every time you want to access the virtual environment moodle xxx.vma.lm.lt, open UrbanVPN, make sure the correct country is selected and launch the VPN by clicking Play.

8. At the end of the session, stop and disable the VPN.

Note. Browsers may offer to add the extension to the browser. For more convenient use, you can add, but not necessary.
