

POP-UP LEARNING

2020-1-LT01-KA226-SCH-094825

Our school is located in Mykonos island, which gives us the opportunity to do a lot of outdoor activities. There are a playground, a football field, volleyball, basketball and tennis courts, too. Our aim is to help our students enjoy the sunny weather and also learn, play and create. Our kindergarten students often have picnics and movement group games outside. Primary school students can practice sports in our fields daily, can play games and interact each other. They can also observe nature and study plants, sound, light and movement of objects in outdoors projects in their science classes. They can draw outside experiencing light and shadows in art classes.

An underwater photograph showing several divers in a clear blue sea. The divers are silhouetted against the bright light filtering down from the surface. Bubbles are visible around them, and the sandy seabed is visible at the bottom. The overall scene is serene and captures the beauty of underwater diving.

Even when we are going through a pandemic
when we have the opportunity we offer
our kids outdoor activities so they keep
in touch with nature, our island culture
and stay healthy in body and mind. We
visit main town (Mykonos chora),
artificial lakes or beaches, historical and
cultural monuments. Kids enjoy
practicing outside things they learn
such as forming numbers and letters
with their bodies, playing games with
music and rhythm, dancing or roller
skating. Our school can offer plenty of
ideas to help students deal with
pandemic and have fun and enjoy
learning and playing at the same time
